

INperfektion GmbH is an emerging company in the automation industry. As a full-service provider for automation solutions, our core disciplines include hardware and software development, electronics manufacturing, electrical system designing, control cabinet construction and much more, all working together successfully.

Through our flat hierarchies, we offer self-reliant peer-supported works.

We put the customer and the team at the center of the company.

We are looking for:

Full-time or part-time Electrical designers (m / f / d)

Description:

In hardware design, you, in coordination with the customer solve the task, as well as effect adjustments with the existing customer.

Likewise, new projects will be implemented according to customer requirements.

Your requirements:

- Lateral entrant with appropriate experience or
- A completed technician training or
- Completed studies in master's or bachelor's degree
- **Professional experience in a similar field of activity**
 - Experience with Eplan 5.7 / P8
 - Good knowledge of English both written and spoken
 - Structured and self-reliant way of working
 - High level of initiative and teamwork
 - Self-reliant and results-oriented way of working
 - You should have a good knowledge of MS Office

What to expect:

- A young dedicated team
- Self-reliant flexible working
- varied projects
- Participation in training programs
- Flat hierarchies and an open, modern corporate culture
