

INperfektion GmbH is a modern and ambitious company in the automation industry. We offer our customers with industry-independent automation solutions, through hardware and software development, to commissioning, and work closely with our customers from the first consultation.

We seek for employees in the field of:

Electrical design / E-designer (m/f/d) full-time

Description:

As a design engineer, you shall independently design switchgear and control systems. In doing so, you should always have lay emphasis on cost, timeframe, and production quality. For larger projects, you are to bring your experience as a team player to the project team.

You are required to present:

- A Degree in electrical engineering, having studied and graduated as a state-certified electrical engineer / master craftsman, or alternatively many years of professional experience in this field of activity
- Profound knowledge in the use of Eplan P8 and the add-ons such as ProPanel
- Knowledge in the field of standards
- Experience in the field of safety engineering or SISTEMA calculation is preferable
- Good command of written and spoken English
- Independent, responsible, and committed way of working
- Communication and teamwork skills
- Willingness to travel on occasion, mainly within the country and its nearby surroundings

We offer you:

- An interesting, challenging job with development opportunities
- Independent, flexible working in a young team and flat hierarchies
- Varied projects in different industries
- Regular training and further education
- Working from home (home office)

Interested?

If you are interested in a change, just give us a call.
