

INperfektion GmbH is a modern and ambitious company in the automation industry.

We offer our customers with industry-independent automation solutions, through hardware and software development, to commissioning, and work closely with our customers from the first consultation.

We are seeking for:

Full time **Software development/ SPS- programmer (m/f/d)**

Description:

As a programmer you will be responsible for the timely, cost-effective, and high-quality implementation of orders in the field of automation. You shall use your experience to independently implement smaller projects or bring your knowledge to larger projects as a team player.

You are required to present:

- A Degree in electrical engineering (automation), having graduated as a state-certified electrical engineer or, alternatively, having many years of professional experience in this field of activity
- A profound knowledge in the handling of Siemens TIA Portal, Step 7 Classic, WinCC(flexible) and the common languages such as FBD/LD/LPD, SCL and Visual Basic Script
- Experience in drive technology and project planning of drives, preferably Siemens, SEW
- Knowledge of system safety / programming safety is preferable
- Basic knowledge in the field of industrial networks
- Good mastery of written and spoken English
- Independent, responsible, and committed way of working
- Communication and teamwork skills
- Willingness to go on business trips, mainly within the country and its surroundings

We offer you:

- An interesting, challenging job with development opportunities
- Independent, flexible work in a young team and flat hierarchies
- Varied projects in different industries
- Regular training and further education
- Work from home (home office)
- A company car for private use

Interested?

If you are interested in a change, just give us a call.
